

VAPENATION

**INTO THE
CLOUDS**

VAPING IS BIG BUSINESS

IN THE UK, AROUND THREE MILLION PEOPLE USE E-CIGARETTES, THIS FIGURE IS EXPECTED TO GROW BY 40% YEAR ON YEAR.

THE REASON WHY?

It's more convenient and less expensive than smoking along with reports from Public Health England and the Royal College of Physicians suggesting that vaping is 95% safer than smoking.

86% of those who have tried vaping say they wouldn't go back to traditional cigarettes.

With the introduction of new legislation in 2016, the vaping industry is maturing, there's a greater focus on quality and safety. Inferior products and dubious manufacturers will struggle to survive.

In this environment, VapeNation is perfectly placed to succeed and expand.

THE RISE OF VAPENATION

The MD of Supreme recognised the potential of the vaping market in 2013. He set up a company that, initially, imported and exported 'cig-a-like' kits and e-liquids. Two brands were created – KiK & 88vape – one premium and one economy, between the two brands, VapeNation now have a 20% market share of the UK vaping market. They also produce private label e-liquids for some well known brands.

Since then VapeNation has gone from strength to strength, they've taken the future into their own hands by entering the retail arena and leading the way in manufacturing. Their superior products and flavours have customers coming back for more.

A worker in a cleanroom, wearing a white hairnet, safety glasses, and a white lab coat with yellow accents, is focused on a task. They are wearing blue nitrile gloves and are positioned in front of a complex piece of machinery. The machinery features a circular carousel with several white vials or small bottles arranged in rows. The background is slightly blurred, showing another worker in a similar cleanroom environment. A green horizontal bar is overlaid across the middle of the image, containing the text "A BRIGHT FUTURE" in white, bold, sans-serif capital letters.

A BRIGHT FUTURE

WE STARTED MANUFACTURING IN JANUARY 2016 WITH THE COMPLETION OF OUR HALF A MILLION POUND CLEAN ROOM FACILITY.

From producing an average 6,000 unpacked bottles of e-liquid a day, we now fill over 1.6million bottles a month. We now have the capacity to produce 100,000 a day with more machinery in the pipeline to take this to 2.4million bottles a month.

Our focus is on quality and achieving and exceeding EU Tobacco Products Directive (TPD) compliance. We go the extra mile to ensure complete product hygiene and traceability.

VapeNation's purpose-built facilities include a state-of-the-art laboratory for mixing batches of e-liquid, two fully automatic machines, three semi-automatic vacuum pump lines, a nicotine analysis lab, and factory staffed by 25 highly qualified and motivated individuals who work with the best materials in the vaping industry.

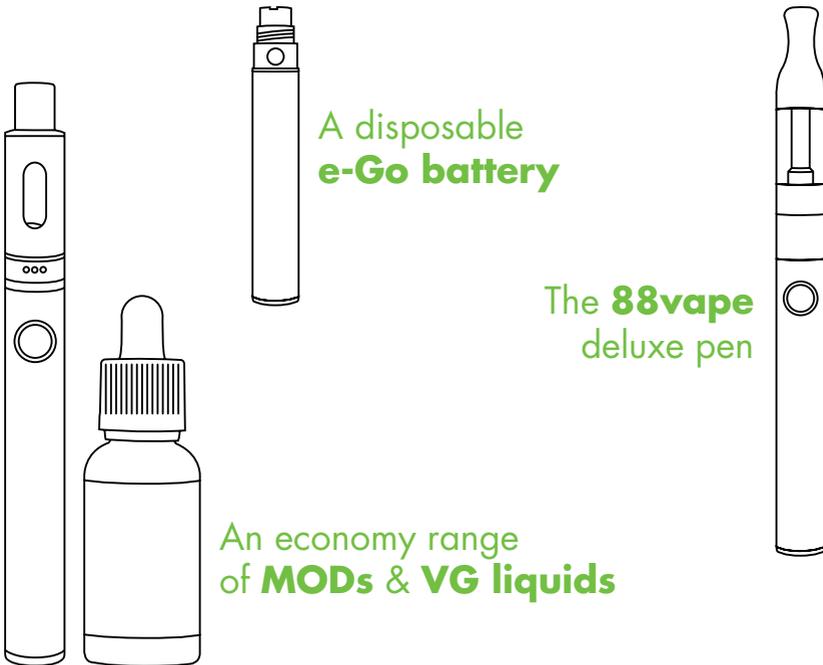

From importer to high quality manufacturer, VapeNation has the capacity to deliver an exceptional product in these exciting times.

MOVING FORWARD

We don't believe in standing still, our R&D department is constantly developing new technology that has the potential to disrupt and dominate the e-cigarette market. Through independent testing we can ensure we're always delivering what customers want.

Our innovations include:

A disposable
e-Go battery

The **88vape**
deluxe pen

An economy range
of **MODs & VG liquids**
